

TOOLS FOR THE CITIZEN SCIENTIST

The NASA Open Government Plan provides a strong multi-dimensional framework of technology, policy, and culture, creating platforms for transparency, participation, and collaboration to better support the Agency's mission to promote the use of NASA's original Plan, released April 7, 2009. The Open Government Plan is a living document dedicated to improving Open Government across the Agency's programs and projects. We set high goals, and we are proud of how far we have come in the first two years. All of these goals are fluid; you'll see growth and movement as we work to determine the best path toward openness. This infographic conveys the progress NASA made toward the original goals in Open Government – our latest efforts in working together with you to enable us all to reach for new heights and reveal the unknown.

We hope this will clearly communicate our progress and keep you informed of new and exciting things within NASA. If you have any questions or comments, we encourage you to visit our NASA Open Government website at <http://www.nasa.gov/open/> and share your ideas.
