Alcune ragioni per il difettoso rapporto Accademia – Industria nel nostro Paese

- cultura
- dimensioni e caratteristiche della struttura industriale
- dimensioni e caratteristiche della ricerca in Italia (ma non nell'area milanese)
- meccanismi distorti di stimolo da parte del pubblico

Note: Figure based on a sample of 226 companies, obtained from matching firms in the FT Global 500 from 2007 with the 2007 EC-IPTS Top 1000 EU and non-EU R&D scoreboard companies. Leading innovators are thus defined both by their market capitalisation and R&D expenditures. The US has 80 companies in this sample, Europe 86 and other countries 60.
